comprehensive solution designed for your unique needs  
Both easy-to-implement and easy-to-use, Source Medical's products are built with true enterprise functionality, providing a comprehensive, scalable solution for stand alone facilities and corporate networks alike. Through industry standard interface capabilities, our applications easily share and exchange data with other in-house systems, facilitating communications and enhancing staff productivity. And, with access to the industry's most comprehensive implementation, training and support program, your staff will always have the resources and expertise they need to deliver optimum results.

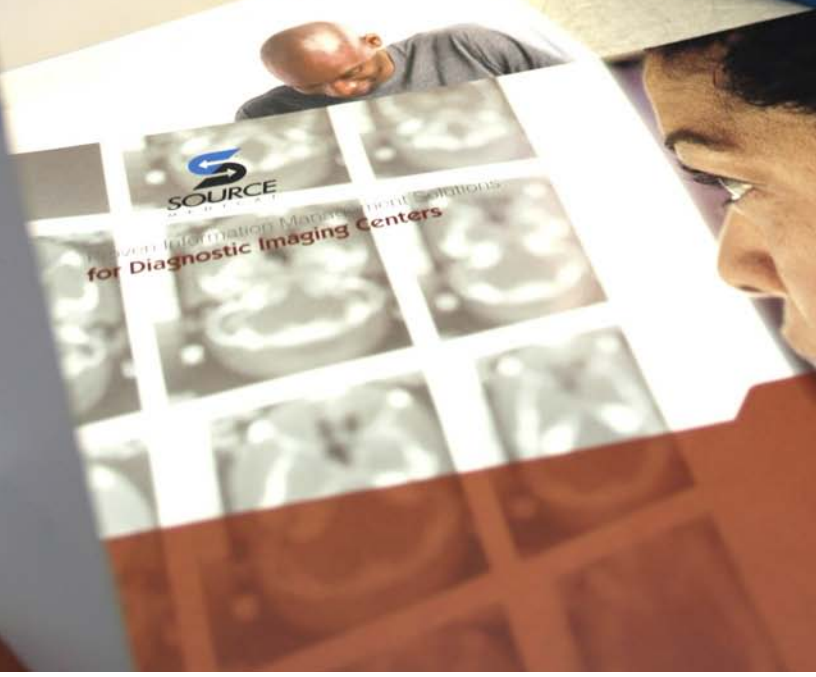

To ensure our products meet the growing needs of our customers, Source Medical continually invests in research and development to foster innovation, drive product enhancements and improve the business of healthcare. With each new release, you'll experience the type of long-lasting improvements that will keep your organization running smoothly for many years to come.

Source Medical's solutions provide end-to-end functionality
